INFINO MPC-1040M & evolve™ : Partnership enhanced sustainability

[Download Article](#)

MacDermid Enthone Industrial Solutions and Lotte Chemical introduce Infino MPC-1040M*, a new type of ABS/PC resin, to be used in conjunction with chrome-free etch process evolve™ .

The combination of MacDermid Enthone's experience in Plating on Plastics for automotive, sanitary, and other applications and the know-how of Lotte Chemical, catalyzed in the development of this state-of-the-art combination of resin and chrome-free etch, matching the highest performance standards of the industry.

Key features

- Fully eliminates Hexavalent Chrome, PFAS and hazardous substances
- Tailored for evolve™ chrome-free etch
- Excellent adhesion
- Advanced performance in thermal cycle tests
- Meets & exceeds engineering specs
- Versatile and adaptable
- Production proven
- Globally available

*The new resin is part of an exclusive agreement between MacDermid Enthone and Lotte Chemical
